

# Formula brief for contract manufacturers

## Product

**Picked Real Fruit Protein Drink Mix.** A juice-style drink made from whey protein isolate, flavored mainly by real fruit. Mix one scoop with 10 to 12 oz of cold water in a shaker.

## Launch flavors

| SKU    | FLAVOR          | FRUIT INPUTS WE WANT TO SEE IN THE FORMULA                        |
|--------|-----------------|-------------------------------------------------------------------|
| PK-STR | Strawberry      | Freeze-dried strawberry powder; strawberry juice powder if needed |
| PK-MAN | Mango           | Freeze-dried mango powder; mango juice powder if needed           |
| PK-RSL | Raspberry Lemon | Freeze-dried raspberry powder; lemon juice powder                 |

Pipeline flavors after launch: Pineapple, Tart Cherry, Peach, Passion Fruit.

## Targets per serving

| ITEM                         | TARGET                                                                                                                                                   | MUST OR WANT |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Protein                      | 20 g from whey protein isolate                                                                                                                           | Must         |
| Protein base                 | Acid-stable or pre-acidified clear WPI (Glanbia BevEdge, Arla Lacprodan ISO.Water, Hilmar 9020, or your equivalent)                                      | Must         |
| Real fruit                   | Fruit is the first characterizing flavor ingredient. Quote the highest fruit load that still mixes cleanly, and state grams of fruit solids per serving. | Must         |
| Other flavors                | First choice: none. Second choice: natural flavor derived from the named fruit only (WONF). Tell us the trade-off in taste.                              | Want         |
| Sweetener                    | Monk fruit and/or stevia Reb M. No sucralose, acesulfame K, aspartame, or sugar alcohols.                                                                | Must         |
| Added sugar                  | 0 g preferred; up to 2 g cane sugar if it materially improves taste                                                                                      | Want         |
| Calories                     | About 90 to 110                                                                                                                                          | Want         |
| Color                        | From the fruit only, or fruit and vegetable juice color                                                                                                  | Must         |
| Artificial colors or flavors | None                                                                                                                                                     | Must         |
| Antifoam                     | None preferred; a food-grade antifoam if foam is unacceptable without one. State which.                                                                  | Want         |
| Mixing                       | Dissolves in a shaker in 15 seconds with cold water, light foam that settles in 1 minute                                                                 | Must         |

| ITEM      | TARGET                                                                                  | MUST OR WANT |
|-----------|-----------------------------------------------------------------------------------------|--------------|
| Allergens | Milk only. No gluten, soy, or tree-nut ingredients. Tell us what else runs on the line. | Must         |

## Packaging and quantities

| FORMAT                    | COUNT                          | FIRST ORDER                                                             |
|---------------------------|--------------------------------|-------------------------------------------------------------------------|
| Stand-up resealable pouch | 20 servings                    | Quote your minimum (for example 144), 1,500, and 3,000 units per flavor |
| Single-serve stick pack   | 1 serving; sold in boxes of 10 | Quote 5,000 and 10,000 sticks across flavors                            |

We supply printed pouch film and stick film, or you source it. Quote both.

## What we need in the quote

1. Unit price at each quantity, with protein, fruit, packaging, tolling, and freight shown as separate lines.
2. Flavor development fee, number of bench rounds included, and sample timing.
3. Minimum order per flavor and whether flavors can share one protein lot.
4. Lead time from approved samples to finished goods.
5. Certifications held: cGMP (21 CFR 111), NSF or equivalent GMP audit, organic, kosher, halal.
6. Testing included per lot: identity, protein content, microbiology, and heavy metals (lead, cadmium, arsenic, mercury). Is a certificate of analysis supplied?
7. Shelf-life or stability testing offered, and its price.
8. Whether you can produce batches eligible for NSF Certified for Sport or Informed Sport.
9. Whether you help with the Supplement Facts panel and label review.
10. Payment terms.

## What we will not accept

- A stock "fruit punch" or "berry blast" base with a fruit name swapped in.
- Any claim of fruit content we cannot back with a batch record.
- Sucralose or acesulfame K, even "just a little".
